

# FILCONS 08 $\mu$ m

Using CTSV FILCONS with different mesh sizes, you can easily remove cell clumps and large particles from your sample after tissue dissociation and ensure that you have a uniform single-cell suspension.

The strainers have smart features, such as:

- Compatibility with 5 (FILCONS) and 50 ml (FILCONS MAX) conical tubes
- Prevent clogging with optimized ventilation
- Compact size for sterile handling
- Syringe fitting for bigger volumes, cup type for smaller volumes

# FILCONS 08 $\mu$ m

## APPLICATION TABLE

08  $\mu$ m

STRAINER TARGET

Erythrocytes, Neutrophil Leukocytes, Young Fibroblasts, Epithelial Cells, Bacteria (Escherichia coli, Bacillus subtilis, Mycobacteria)

TISSUES

Blood, Skin, Lungs, Kidneys, Bones

DISSOCIATION SYSTEM/DEVICE

Medicons cod. 79300 (50  $\mu$ m cut) for Solid Tissues (not for blood)
